- **APIs & Tools:** RESTful APIs, Postman, Git, GitHub, Microservices, SAP-ABAP (ERP)

Work Experience

Backend Engineer Intern

02/2025- Present

Tradexa Technologies, Pune

Achievements: Appreciated for design & development of the below features in the platform:

- **Daily Snapshot For Day Closing:** To track performance across 3 metrics like payment data, sales data and loyalty data across branches & channels.
- **Discount Engine:** Developed multi-tier discounting engine and revamped cart offer system for 4 different discount types
- **Cash In Drawer for POS Channels:** Anomaly detection between opening & closing balance through notifications and available denominations with count at start and end of day.
- **Business Performance Reporting:** Generating 10 new reports in XLSX/CSV formats from ES index.
- **Google Reviews Integration for Webstores:** Achieved by integrating Google My Business API and automating the flow of login, location selection and filtering 4+ star reviews.

Full Stack Engineer Intern

12/2023 – 03/2024

Cyret Technologies, Pune

Worked on legacy and platform migration projects:

1. **Backend Optimization:** Using PostgreSQL and Django REST Framework for optimizing queries by 36% for faster data retrieval and scalability working with 27 tables on a project.
2. **Frontend Modernization:** UI revamp by migrating legacy styling using Typescript and Tailwind CSS, improving responsiveness and driving a 28% increase in user retention.

University Projects and Achievements

- **PitStop DMS** : Currently building a Dealer Management System, for automotive dealers.
Tech Stack Used: React Native, Spring Boot, PostgreSQL
- **JustHoney** (<https://justhoney.co.in>) : An Ecommerce website built for a local apiary.
Tech Stack Used: DRF, Next JS Framework with Typescript and Tailwind CSS, PostgreSQL.
- DilliHouse(<https://dillihouse.co.in>) : A landing page for a hotel chain.
Tech Stack Used: NextJS Framework with Typescript, Tailwind CSS.
- Core Founding team member for the University Tech Club.
